We've Moved

New Employee

Oceanscience welcomes Dr. Joanne Abbondondola our new Business Development Manager for the Underway CTD. Joanne has a PhD in Chemistry and Material Physics from the University of California, Irvine and has a diverse background in technical sales, chemical engineering and teaching.

Joanne's primary responsibility is to develop the US and International markets for the Oceanscience Underway CTD. This revolutionary system is used for making research-quality CTD measurements from rapidly moving vessels. Designed for ease-of-use, portability and reusability, the Underway CTD is cost-effective and environmentally friendly.

Joanne will exhibit the Underway CTD system at [US Hydro 2009](#) located in Norfolk, VA from May 11-14. We invite you to stop by our booth to say hello.

OB09 Recap

Dr. Jochen Klinke and Dr. Joanne Abbondondola from Oceanscience ex-

hibited the Underway CTD system at Ocean Business 2009 in Southampton, UK from March 31-April 2.

The conference took place at the National Oceanography Centre with 275 exhibitors and over 2,000 visitors, including researchers, students and business associates from around the world.

Dr. Jochen Klinke gave a 60-minute presentation with a Q&A session discussing the benefits of the UCTD system. The topics included:

- Use of the UCTD on a moving vessel
- Ease-of-use, portability and reusability
- Environmental impact of expendables
- Performance of the UCTD used in shallow/deep water deployments

Jochen will exhibit the Underway CTD system at [Oceans 09 IEEE](#) located in Bremen, Germany from May 11-14.

We've Moved

Oceanscience moved into a new 6,800 square foot manufacturing facility last March. The move was long overdue; we were bursting at the seams in the old facility. Now we have more room to design, build and support our industry-leading products.

We look forward to serving you in the future and appreciate your business over the last 11 years.
